Biological Psychiatry 1: 393-395 (1969)

Subject Index to Volume 1

Acetylcholine of brain, in avoidance behavior, 87*ff*
Adaptation, 73*ff*
Alpha-2-globulin, effect on amino acid transport, 201*ff*
Amine mechanisms, 193*ff*
Amines, and sleep, 13*ff*
Amino acids
  and sleep, 13*ff*
  in schizophrenia, 201*ff*
  modulators of CNS activity, 15
  of brain, 387*ff*
  protein effect on transport, 378*f*
Anesthetics, and amine mechanisms, 193*ff*
Antidepressant drugs
  effect on brain serotonin, 81*ff*
  effect on sleep, 283*ff*
Auditory deafferentation, effect on cerebral epileptogenicity, 349*ff*
Avoidance behavior, and brain acetylcholine, 87*ff*

Behavior, biochemistry of, 107
Bennett Research Awards, 111
Biochemistry of behavior, 107
Biological Psychiatry, 1, 3
Brain
  activity during sleep, 331*ff*
  and epinephrine, 31*ff*
Bufotenine, and schizophrenia, 189*ff*

Catecholamines
  and reserpine, 62*ff*
  and sleep, 255
  and toxic seizures, 194
  in control of sleep, 164*f*
Cerebral epileptogenicity
  effect of auditory deafferentation, 349*ff*
  effect of visual deafferentation, 349*ff*
Cerebrospinal fluid, and uric acid levels, 367*ff*
Chlorpromazine, and sleep, 94
Cocaine, and biogenic amines, 193*ff*
Computer
  classification of sleep records by, 92
  regional centers for biomedical information, 198
Convulsant activity, and gamma-hydroxybutyrate, 301*ff*
Correspondence, 107
Cortical atrophy, and spinal fluid, 367*ff*
Cyclazocine, analysis of action, 317*ff*

Depression
  and gamma-hydroxybutyrate, 301*ff*
  sleep patterns affected by drugs, 283*ff*
Depressive psychosis, and sleep, 119*ff*
Desipramine, effect on sleep, 283*ff*
DNA, effect of reserpine on, 69
Dreams
  chemical relationships, 243*ff*
  during protracted sleep, 158
  effects of antidepressant drugs, 283*ff*
  effects of hypnotics on, 235*ff*
  telepathic effects on, 259*ff*
Drugs, effect on sleep, 93*f*

Editorial, 3, 115, 199, 299
EEG (*see* Electroencephalogram)
Electrical activity of brain, correlates of, 50*ff*
Electroencephalogram
  effect of bilateral cochlea destruction, 349*ff*
  effect of cyclazocine, 321

Electroencephalogram—*continued*
effect of optic tractotomy, 349
in mental retardation, 338
in sleep, 91*ff*, 131*ff*, 143*ff*, 271*ff*, 290, 344
perceptual correlates of, 49*ff*
Epinephrine
and field dependence, 185*ff*
of brain, 31*ff*
sedative effects of, 13*ff*
threshold of response to, 185*ff*
Evoked potential, consequence of auditory or visual deafferentation on, 349*ff*
Evoked response, correlates with perceptual variables, 49*ff*
Evolution, 73*ff*
Eye movement, as index of sleep density, 147*ff*

Field dependency, response to epinephrine, 185*ff*

Galvanic skin reflex, after epinephrine, 186
Gamma-aminobutyric acid, 387
Gamma-hydroxybutyric acid
and convulsant activity, 301*ff*
and depression, 301*ff*
Glutamic acid, 202, 379
Glutethimide, effect on sleep, 235*ff*
Gustatory acuity, in schizophrenia, 209*ff*

Hyperarousal, in schizophrenia, 209*ff*
Hypnotics, effect on sleep, 235
Hypnotoxins, 163

Imipramine, 325
Indoleamino acids, transport, 377*ff*
Insulin, compared to epinephrine, 187

Learning, during sleep, 335*f*

Memory, and sleep, 339*f*
Mental health, and society, 5
Mental telepathy, 259*ff*
Methamphetamine, 327
Methionine, in schizophrenia, 227*ff*
Methyprylon, effect on sleep, 235*ff*
Mongolism, abnormalities in REM, 338
Mood, effects of hypnotics on, 235*ff*
Muscle potentials, and sleep, 91*ff*

National Institute of Mental Health, 5*ff*, 391
Center for Studies of Schizophrenia, 197
Clearinghouse for Mental Health Information, 297
Neuronal activity, during sleep, 143*ff*
News and Notes, 111, 197, 297, 391
NIMH (*see* National Institute of Mental Health)
Norepinephrine, and sleep, 13, 255

Obituaries, 103, 298, 392
Ouabain, 206

Parachlorophenylalanine, and sleep, 167, 183
Pentazoline, 320
Personality
correlates of EEG, 49*ff*
correlates of evoked response, 49*ff*
Phenothiazines, 210
Physostigmine, 327
Plasma factor, 377
in schizophrenia, 201*ff*
Population explosion, 73*ff*
Procaine, and biogenic amines, 193*ff*
Psychiatry
and mental health, 5*ff*
and society, 5, 115
Puerperal schizophrenia, 97*ff*

Rapid eye movements
and sleep, 91*ff*, 119*ff*, 143*ff*, 147*ff*, 271*ff*
body changes associated with, 277*f*
changes after optic tract section, 352*f*
density, 149*ff*
deprivation, effects of, 181*f*
electrical activity during, 294*f*
hypnotics, effects of, 235*ff*
in mental disease, 157
in psychotics, 119*ff*
in schizophrenia, 179*ff*
relation to age, 337
relation to pharmacological agents, 243*ff*
telepathic effect on, 259*ff*
REM (*see* Rapid eye movements)

Reserpine
and dreams, 252*f*
effect on ganglia, 61*ff*
mechanism of sedation, 219*ff*

Schizophrenia
amino acid transport in, 201*ff*
and REM deprivation, 179*ff*
and sleep, 93, 119, 131*ff*, 338
bufotenine excretion in, 189*ff*
concentration of tryptophan, 381
electrographic sleep patterns in, 119*ff*
gustatory acuity in, 209*ff*
physiological interaction between mother and fetus, 97*ff*
pneumoencephalographic change, 367
protein in plasma of patients, 377
puerperal, 97*ff*
relation to GHBA, 301*ff*
tryptophan metabolites in, 227*ff*
Scopolamine, 323
Sedation, reserpine, 219*ff*
Serotonin
and sleep, 13*ff*, 161*ff*
effects of antidepressant drugs, 81*ff*
in brain tissue, 82
Sex, relation to maternal schizophrenia, 97*ff*
Sleep, 13*ff*, 93*f*, 117*ff*, 147*ff*
amino acids during, 387*ff*
and mental illness, 119*ff*
and psychopharmacology, 91*ff*
body changes in, 271*ff*
brain activity during, 331*ff*
changes with age, 344
chemical relationship to, 243*ff*
control, neurohumoral aspects of, 161*ff*
deprivation effects, 139, 154
duration, 155
effect of antidepressant drugs on, 283*ff*

Sleep—*continued*
effect of hypnotics, 235*ff*
function, 331*ff*
in chronic schizophrenia, 131*ff*
in depressives, 283*ff*
maximal capacity for, 147
neuronal activity during, 143, 333*f*
pharmacological studies, 243*ff*
rhythms, 289*ff*
theories of, 331*ff*
transmitter, 13*ff*
uptake of tryptophan in, 206
Society of Biological Psychiatry, 297, 391
Stress, 389
Subcortical nuclei, sleep rhythms in, 289*ff*

Technology, 73*ff*
Telepathic effects, on REM, 259*ff*
Tranylcypromine, as MAO inhibitor, 229*f*
Tryptophan, 379*ff*
and sleep, 14
effect in schizophrenia, 227*ff*
uptake in schizophrenia, 202*ff*

Uric acid, in cerebral atrophy, 367*ff*
Uricase, 371

Vegetative functions, during sleep, 277*f*
Visual deafferentation, effect on cerebral epileptogenicity, 349*ff*

War, and aggression, 79
Weber ratio, and phenothiazine, 210*ff*
